CRF National Summary of Domestic Trade Receivables Order Form

For over 50 years, the Credit Research Foundation has provided the business credit field with the quarterly National Summary of Domestic Trade Receivables report.

The report sets forth an index, by industry, based on information assembled from creditors. The data, which indexes six key metrics such as: Collection Effectiveness, Days Sales Outstanding, Best Possible DSO, Average Days Delinquent, Percent of Current AR and Delinquent AR over 91 Days Past Due, may be valuable in establishing the criteria to meet the objective test to the "ordinary course of business" in a bankruptcy preference defense.
